No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence

US-08-776-251-10

Sequence 10, Application US/08776251

Sequence 10, Application US/08776251

Patent No. 6025340

GENERAL INFORMATION:
APPLICANT: Springer, Caroline J
APPLICANT: Marais, Richard
TITLE OF INVENTION: Surface expression of enzyme in gene directed prodrug thera
NUMBER OF SEQUENCES: 27

CORRESPONDENCE ADDRESS:
                                Sequence 3, Application US/09200355
Patent No. 6451524
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Ecker, David J.
TITLE OF INVENTION: Identification Of Disease Predictive Nucleic Acids
FILE REFERENCE: IBISO009
CURRENT APPLICATION UNMBER: US/09/200,355
CURRENT FILING DATE: 1998-11-25
NUMBER OF SEQ ID NOS: 4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 SOFTWARE: Patentin Release #1.0, Version #1.25 (EPO)

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                           .....TFKGTPTAENPEYLGLDVPV 266
